About us

Zyle: service and style

At Zyle Fenster we live to create outstanding homes. Transforming properties through the supply of creatively designed and beautifully crafted doors and windows, we only work with the most experienced and professional people in each country so that the quality of our product is matched by the installation and service.

Our prominent designs attract those with a serious sense of style – one that extends to their entire home. Individuality is at the heart of what we do.

We work with customers across Europe to create doors and windows that fill properties with light, positively impacting the interior by perfecting the exterior.

The Zyle Fenster team has more than two decades of industry experience, having served more than a thousand individual projects with our superior products. We work in partnership with architects, engineers and builders locally and abroad to create unique homes for individuals and families who want the best.

We are committed to providing exemplary customer service in all parts of our business, from our interactions with individual customers to the rigorous quality standards that we impose on our products. We meet with a range of European standards for window and door performance and security. We also

test our products regularly in European testing facilities to give our customers confidence in both product performance and longevity.

As part of our service offering, we not only design and create beautiful doors and windows, but also deliver and install them. Our team is fully committed to an outstanding end product for each and every customer.

We offer a range of windows and doors to satisfy the demands of our diverse customer base, as detailed in our product pages. We also supply bespoke products for those whose homes require them, working alongside our customers and their teams of architects and builders to create perfect, unique products that never go out of style.

Bespoke

At Zyle Fenster we believe that no two homes should be alike. The possibilities are endless when it comes to building design, and we delight in working with customers who want their homes to be as individual as they themselves are.

Our expert team of designers and craftsmen love a challenge and we pride ourselves that no shape is too tricky. Triangles, circles, arches, rounded tops, camber tops and trapezoids: Zyle Fenster offers them all!

We also love to get creative when it comes to materials. Aluminium clad windows and doors are a particular speciality of ours. Aluminium clad timber windows and doors offer an extremely attractive, durable finish that works beautifully with contemporary homes. The aesthetics will delight those with a

keen sense of style, while the craftsmanship is simply exceptional.

The Zyle Fenster team takes an active role in working with customers looking for bespoke windows and doors. We encourage customers to make the most of our decades of knowledge and expertise, putting our minds at their disposal during the design phase of their unique homes. We work in partnership with architects to create a vision for our customers of what can be achieved with a little daring and some superb craftsmanship.

Whether it's an entrance door that adds character, a curtain wall that transforms an entire room or sliding doors that create the perfect connection between interior and exterior living space, we delight in working with customers to create bespoke products to meet their needs.

Windows

Zyle Fenster's windows pair high end materials with sleek design to fill your home with light and warmth; choose from classical styles to the ultra-modern with our high performance windows.

Flush casement windows

Flush casement windows offer clean lines and classic finishes to suit a wide variety of homes, from ultra-contemporary residences to characterful older buildings. All of our flush casement windows are available in FSC certified softwood (pine) and hardwood (oak, meranti, sapeli, mahogany) also in larch and accoya wood that matches or exceeds the durability, stability and beauty of the very best tropical hardwoods. They offer side, top and reversible opening styles.

Curtain walls

UValue
0.76
W/m²K

Curtain walls are an exceptionally appealing way to use glass in modern architecture. The use of wood-alum systems and large glass panes allow for the creation of amazing design features that will bring light and the feeling of space to rooms of all shapes and sizes.

Contemporary curtain walls focus on smaller frames with more glass. This allows for lower energy ratings. Our German-built curtain wall system can achieve a U value as low as 0.76 W/m²K. Any type of window (both tilt & turn and casement), entrance door and sliding doors can integrate beautifully with this system, creating an exclusive, modern and energy-saving solution.

Available in a several wood types internally and any RAL colour for outside aluminium cladding, our curtain walls offer a robust, concealed fastening system to bear almost any structural load. Furthermore, the large glass units and innovative thermal system mean that our curtain walls comply with the stringent requirements of the Passivhaus standard.
