# SLIDING SASH SPIRAL BALANCE

- Made to measure
- Excellent U – values;
- Low maintenance
- Concealed Trickle Vent
- Enhanced security
- Adjustable Balances
- Horns to Top Sash
- Slimline glazed

## *Sliding Spiral Balance window*

Spiral Balance windows are a modern design of the traditional weight and pulley range. The mechanism works with a spring on the jambs of the window, so there is no need for a bulky box section frame to encase any weights. That results in slimmer sightlines which result in a larger glass area.

## *Slide and Tilt for Easy maintenance*

The beautifully designed 'Tilt & Slide' sash windows operate in the same fashion as traditional sliding sash windows. However, the sashes can be tilted inwards, this allows for easy and safe maintenance and cleaning. The large selection of hardware available allows you to personalize the windows to your desire. The windows can come in single, double or triple glazed finishes. The product also comes finished with high-quality seals and security locks.

# SLIDING SASH CORDS & WEIGHTS

- Made to measure
- Excellent U – values;
- Low maintenance
- Concealed Trickle Vent
- Internal access to weights for maintenance
- Ball Bearing Sash Pulley
- Horns to Top Sash
- Slimline glazed

## *Sliding Sash Cords & Weights*

It's a most classic box sash window with weights system. It's our primary product, for those who want simple construction and great design.

Cords and weights are the traditional forms in which sash windows operate. The mechanism works by counterbalancing the windows weight with a lead (iron) bar attached to a chord that rolls over a pulley. This enables the sash windows slide up and down with relative ease.

# SASH WINDOWS

## GENERAL INFORMATION

- Sash Windows are made-to-measure and supplied fully factory glazed and finished. Knot-free engineered, warp and twist resistant timber is used throughout

## TIMBER SPECIES

- Engineered Redwood
- Engineered Hardwood
- Engineered Oak
- Accoya

## FACTORY FINISHED

- 10 years paint guarantee
- High performance coatings in any standard RAL color paint finish
- Choice of different stains
- Dual colour option

## GLAZING

- Internally beaded to prohibit removal of the glass from outside with the concealed glazing pins
- 24 mm (4/16/4) double glazed units with Low-E coated energy saving glass and argon gas as standard
- Centre pane Ug as low as 1.1 W/m<sup>2</sup>K
- Acoustic glazing can be used to achieve decibel ratings up to 45 dB
- Anti-sun glass is ideal for large glazing areas as it reduces the amount of heat from the sun
- Obscure glazing is the ideal way to increase privacy
- Toughened and Laminated glass to ensure safety and security

## IRONMONGERY

- Lockable Fitch catches, sash pulls and sash stops in Satin Chrome, Polished Brass, Polished Chrome, Imitation Bronze and Antique Brass

## LAYOUT

- Bay windows, arches and swept heads within sashes available

## ANCILLARIES

- A selection of colour matched timber trims and sill extensions are available to complete your sash window

## TRICKLE VENT

- Concealed Trickle Vent
